ADVANCED BODY CONTOURING & REFINEMENT PROCEDURE WITH RFAL TECHNOLOGY

We all strive to look and feel our best. Diet and regular exercise are at the cornerstones of staying fit, but sometimes these are not enough to achieve the look and feel you desire. BodyTite can help you achieve your goals with one procedure that delivers long-lasting results.

WHAT IS BODYTITE?

BodyTite is an innovative procedure designed for patients who are seeking to treat deep fatty areas and contour their bodies. It is an ideal solution for contracting and improving the appearance of skin which has been impacted by aging, stretching, or weight loss.

BodyTite is a minimally invasive procedure that provides superior body contouring and delivers results only previously achieved through more extensive excisional procedures. With BodyTite you can achieve surgical-like results without large scars or prolonged downtime.

TOTAL BODY SOLUTION: MINIMALLY INVASIVE BODY CONTOURING

"BodyTite has tightened and formed my body and I don't have saggy skin or rolls anymore. Three years after having my baby, I feel like I have a new body image and my shape back."

- L.M. | PATIENT

Breakthrough Body Reshaping.

BodyTite uses RFAL (Radiofrequency Assisted Lipo-coagulation) technology that addresses some of the shortcomings associated with traditional liposuction or surgical body lifts.

WHAT AREAS CAN BE TREATED?

If you can imagine it, you can do it: stomach, arms, chest, knees, and inner/outer thighs are some of the most common treatment zones. Multiple areas can be treated in one visit. Each zone will take approximately 15 minutes of treatment.

HOW QUICKLY WILL I SEE RESULTS?

Results can be seen immediately. Best results are noticeable after 6 weeks and continue over the next 12 months.

WHAT IS THE DOWNTIME?

Depending on the treatment area, downtime can be from 1-2 days up to 10 days.

BODYTITE EFFECTS:

BodyTite gently treats fat in stubborn areas while contouring the skin, helping you sculpt your body into its ultimate shape.

TREATMENT AREAS:

- ARMS
- STOMACH
- BUTTOCKS
- LEGS
